Re: NBC Telemundo License Co.
TELEVISION STATION SECTION 339(a)(2)(D)(vii) WAIVER REQUEST
MB Docket No. 05-317
WNBC-DT, New York, New York; Facility ID No. 47535

Dear Madam Secretary:

NBC Telemundo License Co. ("NBC"), the permittee of WNBC-DT, New York, New York (the "Station"), hereby requests an extension of its existing waiver that delays the date on which satellite subscribers can commence digital television signal tests under Section 339(a)(2)(D) of the Communications Act.¹ The Commission last granted an extension of the waiver (to October 31, 2007) by Order released April 20, 2007.²

Under the Communications Act, as amended, reduced digital coverage because of force majeure justifies the requested waiver. See 47 U.S.C. § 339(a)(2)(D)(viii)(III). The Station, which is located in one of the nation's top-100 markets and expects to operate on its existing digital channel post-transition, has been required to operate temporarily from the Empire State Building following the destruction of the World Trade Center on September 11, 2001. As reflected in the Order, the difficulties facing New York digital stations are well known to the Commission and have resulted in WNBC-DT having less coverage than its authorized parameters should allow.

Specifically, the destruction of the World Trade Center, among other significant concerns, severely disrupted television operations in New York City because there is an extreme shortage of sites in the New York area that are appropriate for the provision of analog or digital television services. In order to identify technically feasible sites for the co-location of

¹ See Public Notice, TV Station Requests for Waiver of Digital Testing Pursuant to the Satellite Home Viewer Extension and Reauthorization Act of 2004 to be Filed by November 30, 2005, or February 15, 2007, DA 05-2979 (released November 17, 2005).

² See Waiver of Digital Testing Pursuant to the Satellite Home Viewer Extension and Reauthorization Act of 2004, Order, MB Docket No. 05-317 (rel. April 30, 2007, DA 07-1957) ("Order"). The Order (¶ 4) directed waiver recipients to file requests for further extension by August 15, 2007. Accordingly, this request is timely filed.

New York broadcasters' DTV and NTSC transmitters and antennas, NBC and other New York area broadcasters formed the Metropolitan Television Alliance ("MTVA"). Since October 2001, the MTVA has worked to examine existing structures from which stations may be able to construct workable digital broadcast facilities as well as attempting to identify potential sites for a permanent home for stations' facilities.

Consistent with these efforts, NBC had concluded that sharing an antenna on the Empire State Building ("ESB") is the best medium-term option, prior to construction of a new facility on the former site of the World Trade Center, by which NBC can provide a sustainable level of over-the-air coverage to the New York market. NBC participated in extensive discussions with ESB management, as well as other parties on the ESB, regarding the work necessary to accommodate digital operations and worked diligently with ESB to negotiate a lease for transmitter and combiner space.

Following development of an understanding on these issues, NBC has made impressive progress in maximizing the extent of service possible from the Empire State Building. NBC has upgraded its New York over-the-air digital facility from the initial STA following the loss of the World Trade Center to a better facility on Rockefeller Plaza to the current facility on the Empire State Building. Although the work continues to be complicated by the challenging and crowded nature of the Empire State Building and complex leasing arrangements, NBC's current ESB digital facility delivers a quality digital signal to WNBC-DT's community of license and much surrounding area. However, the signal is less than what should have resulted from NBC's authorized parameters, a fact for which the Station should not be penalized.

Upon completion of other tower sites in New York, NBC will be able to complete the intended construction. Accordingly, NBC hereby requests an extension of its existing waiver under Section 339(a)(2)(D) of the Communications Act.

Please communicate with the undersigned with respect to this request.

Respectfully submitted,

NBC TELEMUNDO LICENSE CO.
